

# CUSTOMER INFORMATION TIP #5

## Stay In Touch With A Public Address System!

*Keeping up with staff members can be a difficult task!*

- *A Public Address System can make things a whole lot easier.*
- **CALL US FOR A FREE ESTIMATE.**

A Public Address (P.A.) System is a simple & effective way to easily locate staff members throughout your facility. It allows you to relay important information, advise them of an urgent call, or, contact them in the event of an emergency. A properly installed P.A. system will not only save time, but can be very cost effective as well. Staff can simply make an announcement using the P.A. system & then continue on with regular duties without wasting time searching for an individual. P.A. systems can be added to almost any telephone system & when not being used for announcements, most can be used for other purposes such as Emergency Evacuation Signalling or even to play background music. Call us today for more information.
