

# CUSTOMER INFORMATION TIP #6

## ARE YOU READY FOR AN EMERGENCY??

*EMERGENCIES CAN OCCUR AT ANY TIME. ARE YOU PREPARED?*

- *Evacuation Systems don't have to be expensive!*
- **CALL FOR MORE INFORMATION.**

When an emergency situation strikes, it's important to get your staff out of the building as quickly as possible. If someone is left behind or isn't notified properly, the consequences can be devastating.

*An inexpensive "EMERGENCY EVACUATION SYSTEM" installed by BCT can solve the problem. Our system incorporates your existing telephone paging equipment & uses the existing external speakers to notify staff that an evacuation is in progress by sending an audible tone over your speakers once a pull station has been activated or a code has been entered into one of your telephones.*
