

CUSTOMER INFORMATION TIP #8

LIFE CAN BE AN ELECTRIFYING EXPERIENCE!

Are you prepared for that unexpected & unwanted boost?

- *A few preventative measures can save time & money.*
- ***CALL US FOR A FREE ESTIMATE.***

Sudden power spikes can occur at any time of the day or night & cause disastrous results. They can be result of construction work in the area, Power Workers, inclement weather, or faulty wiring. A small surge can easily damage today's sensitive electronic equipment & cause it to malfunction, scramble software, or even reset entire systems. A few simple & inexpensive measures can mean the difference between a day of continued success & efficiency or a day of ***total confusion.***

At BCT we offer a wide variety of surge protection devices for all types of equipment. Call us today for a free quote Don't wait until your business has had that, unexpected & unwanted boost.
